Titles Added to Public Core:

Artificial Intelligence for Autonomous Vehicles: The Future of Driverless Technology

ISBN: 9781119847465

The purpose of this book is to find effective solutions to make autonomous vehicles a reality, providing a bundle of AI solutions for driverless technology that can offer a safe, clean, and more convenient riskless mode of transportation.

Book Bans & Censorship

ISBN: 9781637008973

Is there such a thing as forbidden knowledge? Are some ideas too dangerous for members of a society to handle? Drawing from recent journalism and political writing, this volume of The Reference Shelf looks at the political debate and social movements behind book banning, censorship, and other methods of restricting access to ideas, art, or expression.

Conversational Artificial Intelligence

ISBN: 9781394200566

This book reviews present state-of-the-art research related to the security of cloud computing including developments in conversational AI applications. It is particularly suited for those that bridge the academic world and industry, allowing readers to understand the security concerns in advanced security solutions for conversational AI in the cloud platform domain by reviewing present and evolving security solutions, their limitations, and future research directions.

Pollution

ISBN: 9781642656046

Islands of plastic waste, chemicals from everyday products and prescription drugs, and farm animal waste are all contributing to the destruction of our environment and climate change. Such issues, and the difficulty of solving them, are the subject of this Reference Shelf.

The Sage Handbook of Sociology of Education

ISBN: 9781473967458

The Sage Handbook of Sociology of Education offers a diverse and timely perspective on the intricate relationships between education and society, with expert contributions covering topics such as social stratification, educational policy, and the impact of COVID-19 on early childhood education.
